

# JOHN BUNKER SANDS WETLAND CENTER

## Summer Professional Development

### Wildlife Ecosystems - Focusing on the 4th & 5th Grade TEKS!

Thursday, July 26, 2018  
9:00 am - 12:00 pm

Do your students struggle with the concept of energy flow within a habitat and how it affects the different components of ecosystems? This workshop is designed to specifically address those concepts through learning hands-on activities that will help students remember and understand these concepts and meet the TEKS along the way. Some of the concepts covered include:

- ✓ How energy is transferred within an ecosystem
- ✓ The role of producers and consumers
- ✓ Creation of energy pyramid based on wetland observations
- ✓ Analyzing and graphing results

**Registration due July 19, \$15 pre-registration fee required**

To register, contact Linda Dunn at 972-474-9100 or
