

# Field Investigations & Hands-on Science Designed for Middle & High School Students

*Do your Students know where their water comes from?  
Want them to learn more about water quality and conservation?*

**This is the perfect field study for your students!**

JOHN BUNKER SANDS  
WETLAND CENTER

The John Bunker Sands Wetland Center is located in the center of a man-made 2000 acre wetland located in Seagoville. The water from our wetland provides water to you and your students. What better way to teach students these concepts than to show them a source of their water! We offer hands-on field investigations for students that focus on wetland ecology, water quality and wildlife at the wetland.

## Students will be able to:

- Collect information by observing and measuring water quality
- Use appropriate tools to collect, record and analyze information on water quality and macroinvertebrate populations
- Conduct laboratory and field investigations on water quality and wildlife management
- Predict the effects of changes in ecosystems caused by living organisms

## Scheduling Information:

- Classes for Middle & High School Students
- Programs last 3 hours
- Limit 60 students
- \$7.00 per student

## Programs Offered:

- Wetland Ecology
- Plants: The Workhorse of the Wetland
- Blue Gold: Path to Water Conservation
- Wildlife Management

## Immerse Yourself...
